

MRM- North Western Sewer Connection project

Williamson Road site- changes to parking conditions

What we are doing

In the coming weeks we will be installing a new driveway crossover on Williamson Road. This will formalise the exit driveway for heavy vehicles leaving the work site. Refer to map over page.

In preparation for the driveway construction we will implement restricted parking conditions along each side of the driveway area. The parking restrictions will be in line with our working hours and remain in place until works are completed in early 2024.

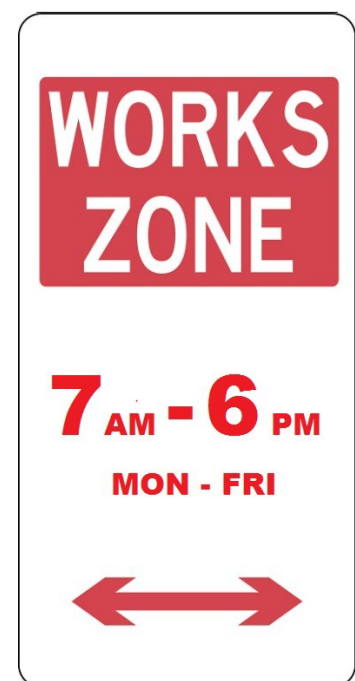

We request that vehicles are not parked near the exit to allow enough visibility and clearance for large vehicles exiting from the site into Williamson Road and to ensure the safety of all road users.

What to expect

- Bollards to be positioned in parking spaces during construction and if out of hours access is required
- Earthworks on the naturestrip to prepare driveway for concrete
- Parking signs to be installed. No parking between 7am- 6pm Monday to Friday. They will remain in place for the duration of the sewer project
- The works to construct the driveway crossover will take two weeks to complete

Safety

For the safety of pedestrians and motorists traffic management will be in place while the construction of the crossover is under way. Please drive with caution as you pass the site.

Working Hours

Works are scheduled to commence Friday 18 March and take two weeks to be completed.

Standard working hours will be Monday to Friday, 7am to 6pm and Saturdays 7am to 1pm. Quiet works will continue onsite outside of these hours.

Location of works

Contact us

You can contact our project team during working hours on 1800 712 434.
