Long Text

Hello review panel,

As a residence of Maribymong it is the worse flood that I have encountered since the 1974 flood . We have been through a few floods in the past but nothing could compare to October 2022 floods ,nothing .

It's impossible to understand the flood disaster unless you have been affected by the floods only these people like myself can only tell you of the devastating affects the October 2022 floods had on each and everyone of the Maribymong resident and community .We lost everything cloths,furniture,computers ,garden equipment and structural damage to the house .

There is no doubt that the flood wall build at the Flemington races had a major impact on the resistance and community of Maribymong ,it's only logical to think that the water from the past floods had somewhere to go through into the Flemington race course and therefore less of an impact .

By putting up the Flemington flood wall it is only logical that the flood waters that used to fill in the Flemington race course was stopped and therefore that water had to go further downstream and course the worse floods in the history since the 1974 floods which impacted the whole of the Maribymong .

There is doubt and it only takes logical thinking if you stop water from coming in the flow has to go further downstream ,in this case the whole community of Maribymong . The question needs to be ask why did they give the green light to go ahead with the Flemington races flood wall ? Why ? We know the Flemington races Me bourne Cup day is a creat a great interest and revenue to Australia but what about the whole of the Maribyming residents didn't they look at how the floods would impact them ? Definitely not ,they didn't look at that ..they cared about the wealth that was created for them ,didn't even look or care about the resistance of Maribymong .

So the wall must come down to prevent further floods in the future and the government must to everything they can to prevent flood disaster in the future, flood basement must be looked at to make it safer for residence to have a basement for further floods in the future they will prevent the destruction of the flood to damage houses and have a safer second or third story structure so they can get to safety and prevent damages house item damage .

Thank you for reading my submission and hope command sense prevail here, thank you.
