Multi Choice

Q15 Do you intend to reopen your business?

Multi Choice

Q16 Do you own the property?

Multi Choice Yes

Q17 Do you intended to sell the property?

Multi Choice No

Q18 Your submission

Long Text

I would like to know why this flood occurred and whatever happened to the measures Melbourne Water had in place to warn residents of a major flood occurring??

Why was the Flemington Racecourse Flood Wall built? This construction caused the river to overflow in areas that were not previously affected by floods.

Melbourne Water needs to invest in mitigation measures - we need Arundel Retarding Basin built asap as decades of promises by Councils, State and Federal Governments never came to fruition in the cities WEST !

Melbourne Water Measuring/Warning Systems were not accurate, please check calculations as they did not add up with the amount of water that was flowing downstream??

Why were Residents not informed of the danger/flooding until it was too late ?? Any additional time allows for storage of valuables to higher level (as most of peoples lifelong possessions were lost in the flood).

Levees need to be built where possible to redirect water flow.

Army needs to assist with rescue (door knocking for some residents was not stated as urgent). The residents said that "the flood of 1993 was much better organised and gave people more time to save their possessions, as well as, sandbags were provided which prevented the flooding of many homes".

During such events the Army should be keeping law and order during cleanup as many household possessions and tradetools were thrown out onto the street which could have been salvaged and also to stop looting.
