UNDERSTANDING FLOODING

Flooding is a natural part of our weather cycle. While it will always happen in cities like Melbourne, we can minimise the risk to people and property.

Scan the QR code below for more information on why floods happen, roles and responsibilities, and who to work with.

BE FLOOD READY

VICSES is the control agency for flooding in Victoria. Their role is to plan for floods, help the community to prepare for floods and manage flood response.

Scan the QR code below for more information and know your flood risk.
